

RESEARCH IN DEVELOPING NATIONS: ELMO 101

October 21 • Noon-1:00 pm

Robert W. Woodruff Library, Room 314, Emory University

Did polling stations open on time in Tunisia? What was the experience of citizens during the Ebola outbreak in Liberia? Where have human rights abuses, such as torture and extrajudicial killings, occurred in Burundi? These are the types of questions we can answer in real time with digital tools, such as The Carter Center's ELMO. ELMO is an open-source data collection and reporting system that is available to Emory faculty and students. The system is specifically designed for research on elections, conflict, human rights, and health in developing nations. Join us for an introduction to ELMO and learn more about how you can use this tool for your own project.

For more information on ELMO, visit getelmo.org.
