

ELMO: Real Time Quantitative and Qualitative Data Collection and Analysis for Your Field Research

Tuesday, January 24th • 2:00 - 3:30 p.m.
Robert W. Woodruff Library Room 312

RSVP NOW For more information please call 404 727 6951 or email idn@emory.edu.

ELMO is an open-source data collection and reporting system designed for use with tablet, SMS or online that is available to Emory faculty and students. Developed by The Carter Center for field research on elections, conflict, human rights, and health in developing nations, ELMO can be adapted for research in many disciplines to make your quantitative and qualitative data gathering and analysis increasingly simple, immediate, efficient and powerful. Join us for an introduction to ELMO and learn more about how you can use this tool for your research project in the field of humanities, social sciences, public health, and others.

This event will provide a general overview of ELMO and its main features for students interested in applying ELMO to their research. This session is especially beneficial for any graduate students who plan to submit an application for the ELMO grants.

ELMO grants are currently available for the 2017-18 fellowship and 2017 research projects. Advanced doctoral students are eligible to apply for the ELMO Initiative Fellowship.

CLICK HERE TO APPLY.

Doctoral students interested in using ELMO for short-term field research are also eligible to apply for IDN funding. The deadline for the ELMO Initiative Fellowship is March 14, 2017 and the deadline for the ELMO related graduate research is February 1, 2017.
